Lindex Disc Chipping System

*Finally a knife system that offers
the best of both conventional
and disposable systems.*

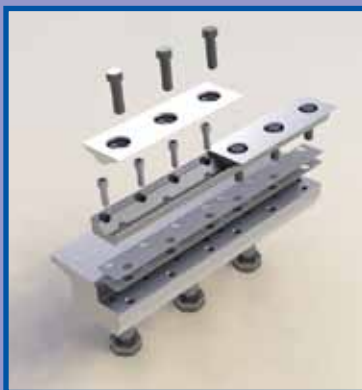

Finally a knife system that takes simplicity, strength and lower costs of a conventional system and combines it with the dual-sided and single knife changes of the disposable setups.

Gone are the babbitt pots, big heavy knives and awkward clamp studs of the old systems.

Lindex knives can be reground multiple time unlike disposable systems. A reground knife is ground at the same angle as a new knife.

FEATURES

- **Designed to fit most disc chippers**
- **Strong, simple system that utilizes a 2-sided knife that can be resharpened multiple times.**
- **No babbitt or adjusting of anvils between regrinds.**
- **Fewer parts, no clamps – making knife changes easy.**
- **Lower knife costs than disposable systems.**
